| SECTION 2 – HAZARDOUS IDENTIFICATION           |                                                                               |
| <b>MAIN HAZARD:</b>                            | Essentially non-hazardous                                                     |
| <b>FLAMMABILITY:</b>                           | Not flammable                                                                 |
| <b>CHEMICAL HAZARD:</b>                        | None                                                                          |
| <b>BIOLOGICAL HAZARD:</b>                      | Prolonged skin contact may defat the skin                                     |
| <b>REPRODUCTIVE HAZARD:</b>                    | Not known                                                                     |
| <b>HEALTH EFFECTS</b><br><i>(eye contact)</i>  | Stinging sensation                                                            |
| <b>HEALTH EFFECTS</b><br><i>(skin contact)</i> | May be irritating to skin with prolonged use                                  |
| <b>HEALTH EFFECTS</b> <i>(ingestion)</i>       | May be harmful if swallowed                                                   |
| <b>HEALTH EFFECTS</b> <i>(inhalation)</i>      | Not expected to be a hazard under normal use conditions with good ventilation |

| SECTION 3 - COMPOSITION                            |                                                                                                      |           |                |
|----------------------------------------------------|------------------------------------------------------------------------------------------------------|-----------|----------------|
| HAZARDOUS COMPONENTS:                              |                                                                                                      |           |                |
|                                                    | %                                                                                                    | EC NUMBER | CLASSIFICATION |
| ESSENTIALLY NON-HAZARDOUS INGREDIENTS:             |                                                                                                      |           |                |
| SECTION 4 – FIRST AID MEASURES                     |                                                                                                      |           |                |
| PRODUCT IN EYE:                                    | Immediately flush with water for at least 15 minutes or until irritation stops. Seek medical advice. |           |                |
| PRODUCT ON SKIN:                                   | Rinse with water. Apply hand lotion with prolonged use.                                              |           |                |
| PRODUCT INGESTED:                                  | DO NOT induce vomiting. Give copious amounts of water to drink. Seek medical advice.                 |           |                |
| PRODUCT INHALED:                                   | Remove to fresh air. Consult physician, should breathing still be difficult.                         |           |                |
| SECTION 5 – FIRE FIGHTING MEASURES                 |                                                                                                      |           |                |
| EXTINGUISHING MEDIA:                               | Not applicable                                                                                       |           |                |
| SPECIAL HAZARDS:                                   | None                                                                                                 |           |                |
| PROTECTIVE CLOTHING:                               | Not applicable                                                                                       |           |                |
| SECTION 6 – ACCIDENTAL RELEASE MEASURES            |                                                                                                      |           |                |
| PERSONAL PRECAUTIONS:                              | None                                                                                                 |           |                |
| ENVIRONMENTAL PRECAUTIONS:                         |                                                                                                      |           |                |
| SMALL SPILLS:                                      | Flush to approved drain with plenty of water                                                         |           |                |
| LARGE SPILLS:                                      | Absorbed onto inert material. May be buried in an approved landfill site.                            |           |                |
| SECTION 7 – HANDLING AND STORAGE                   |                                                                                                      |           |                |
| SUITABLE MATERIAL:                                 | Polyethylene containers (original container)                                                         |           |                |
| HANDLING / STORAGE PRECAUTIONS:                    | Avoid prolonged contact with skin and contact with eyes. Store in a cool dry place.                  |           |                |
| SECTION 8 – EXPOSURE CONTROL / PERSONAL PROTECTION |                                                                                                      |           |                |

|                                    |                                                                                                                   |
|------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| OCCUPATION EXPOSURE LIMITS:        | Not applicable                                                                                                    |
| ENGINEERING CONTROL MEASURES:      | None                                                                                                              |
| PERSONAL PROTECTION: (respiratory) | None                                                                                                              |
| PERSONAL PROTECTION: (hand)        | None                                                                                                              |
| PERSONAL PROTECTION: (eye)         | None                                                                                                              |
| PERSONAL PROTECTION: (skin)        | Overalls                                                                                                          |
| OTHER PROTECTION:                  | Ventilation (local exhaust)                                                                                       |
| HYGIENE MEASURES:                  | Wash hands, forearms and face thoroughly after handling product and before eating, smoking and before going home. |

## SECTION 9 – PHYSICAL AND CHEMICAL PROPERTIES

|                           |                                                        |
|---------------------------|--------------------------------------------------------|
| APPEARANCE:               | Milky-white liquid                                     |
| ODOUR:                    | Floral fragrance                                       |
| pH (as is)                | 6.5 – 8.0                                              |
| BOILING POINT:            | Approx. 100°C                                          |
| FREEZING POINT:           | Not determined                                         |
| FLASH POINT:              | Not flammable                                          |
| FLAMMABILITY:             | Not flammable                                          |
| EXPLOSIVE PROPERTIES:     | Not considered as a product that has no explosion risk |
| OXIDIZING PROPERTIES:     | None                                                   |
| VAPOUR PRESSURE:          | Not determined                                         |
| DENSITY @ 20°C:           | 1.01 ± 0.01g/cm <sup>3</sup>                           |
| SOLUBILITY: (water)       | Complete                                               |
| SOLUBILITY: (solvent)     | Soluble in polar solvents                              |
| SOLUBILITY: (coefficient) | This product is more soluble in water                  |

## SECTION 10 – STABILITY AND REACTIVITY

|                         |                                   |
|-------------------------|-----------------------------------|
| STABILITY:              | The product is stable             |
| INCOMPATIBLE MATERIALS: | Strong acids and oxidizing agents |

## SECTION 11 – TOXICOLOGICAL INFORMATION

### LOCAL EFFECTS:

|                   |                                                                                                                                                              |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| SKIN IRRITATION:  | In case of prolonged skin contact only                                                                                                                       |
| EYE IRRITATION:   | Hazardous in case of severe eye contact (irritant)                                                                                                           |
| ACUTE TOXICITY:   | LD <sub>50</sub> (rat): 1288mg/kg (rat)                                                                                                                      |
| CHRONIC TOXICITY: | Severe eye irritation may be produced with repeated or prolonged contact with concentrated product. Ingestion may cause nausea, vomiting and / or diarrhoea. |

### SPECIFIC EFFECTS:

|                       |                                       |
|-----------------------|---------------------------------------|
| CARCINOGENIC EFFECTS: | None, as classified by OSHA and NIOSH |
|-----------------------|---------------------------------------|

## SECTION 12 – ECOLOGICAL INFORMATION

### ECO-TOXICITY:

|                        |                                                                                                               |
|------------------------|---------------------------------------------------------------------------------------------------------------|
| ECO-TOXICITY IN WATER: | Not expected to be harmful to aquatic organisms.                                                              |
| BIODEGRADABILITY:      | Biodegradable. If used responsibly, this product is not expected to cause adverse effects to the environment. |

## SECTION 13 – DISPOSAL CONSIDERATIONS

|                                 |                                                                                                      |
|---------------------------------|------------------------------------------------------------------------------------------------------|
| DISPOSAL CONSIDERATION:         | DO NOT re-use containers. Puncture all plastic containers.                                           |
| DISPOSAL METHODS:               | Waste must be disposed of in accordance with local government and environmental control regulations. |
| WASTE CLASSIFICATION:           | No additional information.                                                                           |
| EUROPEAN WASTE CATALOGUE (EWC): | No known data.                                                                                       |
| HAZARDOUS WASTE:                | The classification of this product may meet the criteria for hazardous waste.                        |

## SECTION 14 – TRANSPORT INFORMATION
